

CLASS : 6

SUBJECT : MATHS

CHAPTER: FRACTION ANSWERSHEET

1. Write proper fraction whose numerator is 5 and denominator is 7

Answer – 5/7

2. Write proper fraction whose numerator and denominator add up to 10

Answer -1/9 , 2/8 , 3/7 , 4/6 , 5/4 , 7/3

3. How many fraction lie between 0 and 1 ?

Answer – There are infinite number of fractions in between 0 and 1

4. Represent $\frac{4}{5}$ on a number line .

5. Express in proper fraction as mixed fraction $\frac{21}{4}$

Answer – $5 \frac{1}{4}$

6. Express the mixed fraction as improper fraction $7 \frac{3}{10}$

Answer – $\frac{73}{10}$

is an improper fraction

7. The equivalent fraction $\frac{35}{28}$

$$\frac{35 \div 7}{28 \div 7} = \frac{5}{4}$$

The answer is 5/4.

8. find the equivalent fraction of

130/230 and $\frac{1}{2}$

we will cross multiply numerator of one number to the denominator of other so

$$130 \times 2 = 260$$

$$230 \times 1 = 230.$$

So in this case answer is not equivalent.

9. 0 is the smallest number

Greater is the denominator lesser is the value of fraction , provided the numerator is same .

Answer.

Ascending order

$$0 < \frac{1}{11} < \frac{1}{9} < \frac{1}{6} < \frac{1}{4} < \frac{1}{2}$$

10.To subtract we take out the LCM which is 10

$$\frac{69 - 37}{10} = \frac{32}{10} = 3 \frac{2}{10} = 3 \frac{1}{5}$$

11. Suji's house is at a distance

$$= \frac{9}{10} \text{ km}$$

Distance travelled by bus

$$= \frac{1}{2} \text{ km}$$

Distance walked by Suji

$$= \frac{9}{10} - \frac{1}{2}$$

$$= \frac{9-5 \times 1}{10}$$

$$= \frac{4}{10} \text{ km}$$

$$= \frac{2}{5} \text{ km}$$

12. Length of ribbon bought by

$$\text{Rozy} = \frac{3}{5} m$$

Length of ribbon bought by

$$\text{Mary.} = \frac{3}{4} m$$

Total length of ribbon bought

$$= \frac{3}{5} + \frac{3}{4} \quad , LCM \text{ of } 4, 5 = 20$$

$$= \frac{3 \times 4 + 3 \times 5}{20}$$

$$= \frac{12 + 15}{20}$$

$$= \frac{27}{20}$$

$$= 1 \frac{7}{20} m$$
