

Welland Gouldsmith School
Mathematics worksheet
Class- 3
Chapter- 2 Addition
(3 and 4digits)

Synopsis

- When we add numbers the sum is always greater than the numbers being added
E.g. $22+15 =37$.
- Numbers can be added in any order. Their sum will remain the same. E.g. $13+12 =25$.
 $12+13=25$
- When 0 is added to a number the sum is the number itself
- E.g. $6+0 = 6$. $0+21=21$.
- In 3 digit numbers we have the Ones house, the Tens house and the Hundred house.
- Let us add these 3 digit numbers 542 and 423 . keep in mind that the numbers should
- Be in the correct house.

H T O.

$$\begin{array}{r} 542 \\ + 423 \\ \hline 965 \end{array}$$

- This is how we add 3digit numbers
-
-
- Now let us add 4 digit numbers.
- In 4digit numbers we have the Ones house, Tens house
the Hundred house and the Thousand house. Let us add 6291and 3542.
- Keep in mind that the numbers are written in the correct house
- Th H T O

1

6 2 9 1

$$\begin{array}{r} . 3542 \\ + 9833 \\ \hline \end{array}$$

This is how we add 4 digit numbers.

Let us add 3 digit numbers

$$\begin{array}{lll} 1) \text{ H T O} & 2) \text{ H T O} & 3) \text{ H T O} \\ 432. & 612. & 431. \\ + \underline{210.} & + \underline{221.} & + \underline{214} \end{array}$$

$$\begin{array}{lll} 4). \text{ H T O.} & 5) \text{ H T O.} & 6). \text{ H T O} \\ 241. & 312. & 702 \\ + \underline{102.} & + \underline{122.} & + \underline{132} \end{array}$$

Let us add 4 digit numbers

$$\begin{array}{lll} 1) \text{ Th H T O.} & 2) \text{ Th H T O.} & 3) \text{ Th H T O} \\ 4321. & 3916. & 4231 \\ + \underline{4022.} & + \underline{3221.} & + \underline{2140} \\ \\ 4). \text{ Th H T O.} & 5). \text{ Th H T O.} & 6). \text{ Th H T O} \\ 6231 & 4872. & 8134 \\ + \underline{1743} & + \underline{4213.} & + \underline{1127} \end{array}$$
