K.G WORKSHEET

SUBJECT – SCIENCE

TOPIC- BIRDS

RECAPITULATION:

In today's lesson we learnt about different kind of birds and their characteristics.

1. **Crow** :- It is black in colour. It has a sharp beak to eat its food. The crow is regarded as a clever bird. They eat both plants and flesh of animals.
2. **Peacock** :- It has a huge fan like colourful feathers. It has a long neck. The peacock is the national bird of India. You know, the peacock loves to dance in the rain. They eat seeds of plants and small insects.
3. **Sparrow** :- Sparrows are of small size. It is brown in colour. They are very active in nature and sparrows love to eat seeds with their tiny beak.
4. **Parrot** :- Parrots are pet animals. It has a curved beak and sharp clawed feet. The parrot is green in colour and one of the most beautiful birds in the world. Parrots love to eat seeds of the plants, fruits and chillies.
5. **Pigeon** :- It has small feet and a beak. They love to eat seeds.
6. **Swan** :- Swans are water birds with heavy bodies and long necks. They are white in colour. They are also strong fliers and eat grass, worms, small fish and frogs.
7. **Eagle** :- Eagles are large, powerful birds of prey. Eagles have large hooked beaks and powerful talons which help them catch prey. Eagles build their nest on high cliffs or tall trees. They eat other animals and birds.
8. **Cuckoo** :- Cuckoos have a long tail and a medium to long legs. Its outer toe is pointed backward. There are different colour cuckoos like blue, brown, grey and they have different combinations of spots and patterns. They eat insects.

Q1) Look at the pictures and write down the name of the birds:

Q2) Fill in the missing letters:

1. c ____ ow

2. peac ____ ck

3. spar ____ ow

4. parr ____ t

5. pig ____ on

6. s ____ an

7. ea ____ le

8. cu ____ koo

Q3) In your science exercise book write down the name of 8 birds and stick pictures.
