

CLASS -3**SUBJECT – GEOGRAPHY****TOPIC – OUR TRASPORT**

Different means of transport help us to carry people and goods from one place to another. There are three main means of transport. Land transport, water transport and air transport. In big cities cycles, rickshaws, buses, scooters and cars are used. To visit friend and relatives in other cities we use the railways. To visit them in other countries we use aeroplanes or ships. Helicopters are used for military purposes. Goods trains, carts, trucks and ships are used for carrying goods from one place to another. In villages bullock carts and cycles are used for transportation. In the deserts camels are used, in hilly areas ponies and mules. Elephants are used in the forests. Ropeways are trolleys are used in the mountains and in areas covered with snow, sledges are used.

The underground railways is called the metro. It is one of the most important means of transport in the cities. Faster transport facilities and modern means of transport have brought different countries of the world together.

QUESTION 1:**Unscramble the following words:**
