

Welland Gouldsmith School

Class 1

Arithmetic

Problem Sums based on Subtraction:

Recapitulation :

The teacher explains the problem sums with the help of three different stories. She explains the two key phrases that are – ‘how many remain’ and ‘how many are left’ to help them find out the answers to the problem sums.

Worksheet :

- 1) Emily had 45 dolls but she gave 12 dolls to her sister. How many dolls are left with Emily?
- 2) In an orchard there are 24 apple trees. 11 trees were cut down. How many trees are left?
- 3) A fish seller catches 450 fishes. He sells 220 fish in the market. How many fish remain with him?
- 4) In a garden there were 670 roses. Sam picked 370 roses from the garden. How many roses remain in the garden?
