

## Class 4 Geography Worksheet

### Topic: Rivers of India

#### Synopsis:

- On the basis of origin the rivers of India can be divided into Himalayan and peninsular rivers.
- The Himalayan rivers are perennial rivers that, they carry water throughout the year. Indus, Ganga, Yamuna and Brahmaputra are some Himalayan rivers.
- The peninsular rivers are non perennial, they do not carry water throughout the year. Mahanadi, Godavari, Krishna, Kaveri and Narmada are some peninsular rivers.
