Q4. State True or False:

1. Amazon Basin also has a Polar type of climate- [False](#)
2. Winters are very long and extremely cold in the Polar Region- [True](#)
3. Our country India lies in the Temperate Region- [False](#)
4. We can divide the world into five climatic regions- [False](#)
5. The temperature is very high in the Tropical Region- [True](#)

Q5. Answer the following questions:

1. What do you mean by a climatic region?

Ans: A broad area having a similar type of climate is called a climatic region.

2. What type of climate is found in the Tropical region? Name two places having a Tropical climate.

Ans: There are 3 types of climate found in the Tropical region.

A. Hot and wet climate.

B. Monsoon type of climate.

C. Hot and dry desert type of climate.

Two places having a Tropical climate are the Amazon Basin in South America and the Congo Basin in Africa.

3. What do you mean by a Temperate region? Describe the climate found in the Temperate region.

Ans: The Temperate region lies between the Tropic of Cancer and the Arctic Circle in the Northern Hemisphere and between the Tropic of Capricorn and the Antarctic Circle in the Southern Hemisphere.

The summers are not so hot and the winters are very cold.

4. What type of climate is found in the Polar region?

Ans: The summers are very short and cold, winters are very long and extremely cold. This region is also frozen for most part of the year.
