Science Answer Key

Class- II

1. Answer the following questions:

- a) The three sources of water are rainwater, groundwater and water from melted snow.
- b) All types of water are not safe for drinking because people throw dirt and waste in them. It may contain germs of diseases and dissolved salts.
- c) The three uses of water are drinking, cooking and bathing.
- d) The water from taps is good for drinking as the water is purified and is stored in big tanks at high places and it is sent to our houses through pipes.
- e) The two ways in which we can save water are:
 - (i) We should not leave the tap open.
 - (ii) We should collect rainwater in tanks drums and buckets. This water can be used for watering plants, cleaning cars, etc.

2. The children must draw and colour on their own.

- Answers for Exercises B, C and Fun Time from the textbook. (Page 61)

B. Fill in the Blanks.

1. wells
2. rain
3. river
4. tap

C. Tick (✓) the true and cross (✗) the false statement:

1. ✓
2. ✗
3. ✓
4. ✓

Fun Time:

The children must draw and colour on their own.
